11 000000 1962 IDEA-0926-62

HENORANDEM FOR THE RECORD:

SUBJECT: Trip Report and Security Survey you Proposed Utilization of MaCoy Air Force Base, Orlando, Florida, as an IDEALUST Advanced Staging Base.

TARK PURCE REPRESENTATIVES:

1. On 8 October 1968 a task force from Backgrarters CSA visited McCoy Air Force Bace, Orlande, Florida, for the purpose of reviewing the feasibility of deployment from that location on future IDEALIST missions. The following individuals from colocted sections of OSA were represented:

PRE-COMPERSION REVIEWS

2. On 9 October 1968 the shore indicated individuals not in the lounge of the McCoy AFS Officers Club, and seviewed their meets and estimates in the fields of communications, legistics, operations, security, AFCID-5 and McCoy AFS support. The selected group detailed their positionss, proposals and plan of action for the meeting with Col. Milliam G. Malker, Ving Communics, 4047th Strategie Ming, SAC. The group collectively agreed that space requirements, subicles and a compact secure area of sparetions, would be the more difficult areas of support to attain, satisfactory to the demands of the OSA task force.

PROPOSALS TO SAC GOOGGERR:

3. At 1000 on 9 October 1968 the above individuals were contacted by Col. Walker of the 40k7th Strategic Wing, and convends at his Best-quarters conference room for discussions of required support necessary to Det. O deployment at McCoy AFB. A discussion communed which reviewed item by item the sectional needs of the representatives present. Cal. Walker seemed completely cooperative while deferring judgment on certain requests until he was able to sensult his director of material on many uniters of legistical support. At this point, the writer advised that the director of material would have to be briefed prior to any consultation on the deployment proposals.

USAF review(s) completed.

25X1

BRIDTING!

- 4. On 9 October 1962, while at the Hoodquarters building of the 4047th Strategic Wing, EAC, the following individuals were brinted and indestrinated IDEALIST -III:
 - 1. Id.Col. Villiam H. Pittman, Director of Material, 4047th Stratogic Wing, SAC
 - 2. IA.Col. Hilling Jacobson, Jr., Deputy Economics for Operations, 4047th Strategic Ving. SAC
 - 3. Johnstham G. Last, Detachment Commander, OSI, 6th District, McCay Air Force Base
 - 4. It.Gol. Harry J. McDonald, Chief, Com-Electronics Division, 4047th Strategic Wing, SAC

PLICET LINE SURVEY:

5. With all appropriate INTALIST briefings completed, the selected Bondgearters group, Detechment O Commander, Col. William Walker, and Lt. Col. Villian H. Pittman, left the SAC Headquarters building and toured the entire McCey AFB installation to select a deployment location compatible with security and locistical requirements. The flight line area was studied and notice was taken of the face that SAC security regulations were in effect with bedging procedures, femced ereas, sentries, patrols and sentry dags employed on 24 hour basis. A disturbing feature of the flight line is one of the runways on West side of field is utilized by commercial jets, which may pose a security problem during periods when IDEALIST aircraft are immeted or retrieved. Commercial flights average eight (8) a day and must be menitored by Det G. security. Another unconfurtable feature on the flight line is the pressure of several EA-16 patrol planes which have been rentering air-sea resous support for IRALIST missions. It is the writers understanding that the SA-16 erous are guartered in a 300 which will most likely accommodate Det G personnel.

ENLEGATION OF DEPLOTMENT STITE AND MINISTRACTIONS:

6. After a complete review of the McCey AFS installation, it was decided that none of the two available hangers would suit the mosts of Det. C group, since those hangers would not be accessible for Det C ameliative use inview of SAC requirements. This would disturb the SAC element as well as being inconvenient to the deployment group when sensitive parts of the aircraft would be exposed. Hence, it was decided to medify it none-decks listed an the attached diagram as buildings to and tok, which are lacated on the Marth and of the flight line. These none-decks would house the deployment aircraft, and after removation would provide the desired security. Adjacent to the mass-decks is building to6, which will accommodate the various sections of deployment party, consisting of communications, personal equipment, flight planning and special equipment. As of this noment, steps have been under taken to modify the building so as to be adaptable to a field special

Vindous are being covered, deers intehed, and access restricted. It is intended that this even also be utilized as a storage facility for pre-positioned deployment equipment of an unclassed fiel nature. Currently, a sentry central point is in eperation at this end of the flight line, but Cal. Walter would agree to alone this post if it is our desire. On the other hand, this access may could remain open to Dot. G traffic with all other traffic being diverted to another gate. Through posting of restricted signs.

ACCRES BADGE REQUIREMENTS:

7. Gal. Walker suggests that he be furnished with the manus of Dat. O personnel with certification that they pessess appropriate levels of electroses, at least ENTRY so that he will be able to provide the measury access badges with polareid pictures of individual beaver attached thereto.

FURL PROZECTION

8. Madey APS has a controlled bulk fuel storage area which will be utilized by Det 8 for their fuel storage as well. It is planted to utilize a contar our which will be withdrawn from the fuel compound as the mode domind, and while sutside the fuel area the tarbor our will be accompanied by a scotry, according to appropriate the fuel was appropriate to appropriate from Oal. Walker.

REVIEW OF PHYSICAL PRATURES AND LOCAL SITUATION:

- 9. The fellowing physical security items were reviewed and are hereby considered authorstory to CEA Security Section:
 - a. Fences Maire base almost empletely enclosed.
 - b. Overall aims of area Approximately 4,000 acres.
 - e. Housing within area for consistive equipment Buildings 401, 402, and 406, when medified, will be adequate.
 - 4. Feet patrols and gened requirements Det G security that control interval compound while air police support may be assured as model.
 - e. Local proce problems Base requires reuties notices in local newspayers.
 - t. Lighting Scientia.
 - g. Adjacent reads West and of flight utilized by
 - h. Adjacent effices of buildings near the cavirons of bol, bot, and bot Personnel in adjacent leastions will be diverted from utilizing the access gate near the Det. O restricted area, and will be cautioned not to intrude on CEA operations through accessed elements.

25X1A

1. Plickt lim - Flight lime even of McCoy AFS is under stant control day and night with utilization of 26 contry dags during dark hours on all code of the field. i. Air Pelies - Air Pelies support may be secured by direct requests to the Communder of the 4047th Stuntogie Ving. IM. k. Stop over exrecte security megalrements - It is ambinipated that a journey from the Det. G home lecation vill encoupees 8-10 hours flying time via C-124, but could be reduced through use of factor sireraft. It does not appear that any exercise stops will be messeatry. It is the writers understanding that the summerial jets side of flight line services Les Angeles and Baltimore Friendship Airport. COVIER STORY 10. A vital point of concern to Col. Walker and 25X1 was the most of an adequate cover story to explain the presents of Det. 6 personnel and equipment at NeCey AFB. It was also desire to be free to indicate that his unit arrived from California. MISSION PILON HOUSING: 25X1A 11. It is the intended plan of Dat. G Committee to home his missions pilers at a off base motel with transportation being furnished by our routel. The purpose for this move was to reduce the potential of noise level disturbance to sleeping mission pilots. The writer does not foresee any security problem in this situation, infact recommends it. 12. In conculsion, it can be sented that Col. Malker has agreed to permit Det. G military and civilian personnel to whilise his PX personnel of his BOQ. facility while on TDY, and con accomplate MARKET TOTAL CONTRACTOR : 13. Your attention is directed to the attachments which include base diagrams, breskure, and telephone directory. 25X1A
